

About ConnexALL®

ConnexALL® breaks the barriers of proprietary interfaces, it provides a single point of management for ALL business systems which need to communicate events and status to many different devices.

ConnexALL® seamlessly integrates proprietary event-based business systems to an ever-expanding list of third-party notification technologies.

If "something happens" and "someone needs to know about it" ConnexALL® is the communications bridge that can intelligently bring the two together.

ConnexALL® is a standards-driven, modular based software engine. It integrates a wide range of communication resources to any business systems. The ability to receive real-time notifications and text messages anywhere in the world gives organizations the competitive edge in decision-making process.

CONNEXALL®
Door Alarm Management Solution

ALERTS

- Immediate notification to any combination of communication devices when any alarm system is in alert status, off-line or malfunctioning
- Escalate alerts if an employee doesn't acknowledge receipt of an error message
- Send management alerts if the system is armed or disarmed outside of the specified hours

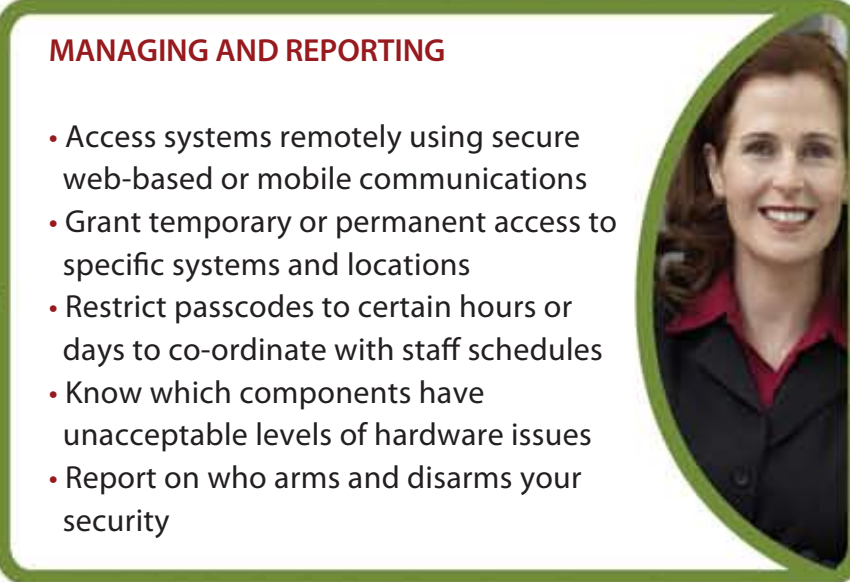

REDUCE DOWNTIME

- Inform security personnel of alarm codes and area conditions before they arrive at on-site problems
- Authorize personnel to use one-touch alert features to cancel alarms or call for back-up
- Available in redundant configurations to ensure continuous operation without downtime
- Calculate and project when your systems components will need maintenance
- Remotely restart your systems in the event of an error

MONITORING

- Monitor all exterior alarm contact points and zones from one centralized location or mobile device
- Monitor multiple interior and exterior zones for movement, sound or heat changes
- Set systems to react to other event alerts, such as unlocking all doors in case of fire
- Use easy-to-understand icons to set scheduling, timers, filtering, and reporting
- Use GPS to monitor personnel movements and reset systems accordingly

MANAGING AND REPORTING

- Access systems remotely using secure web-based or mobile communications
- Grant temporary or permanent access to specific systems and locations
- Restrict passcodes to certain hours or days to co-ordinate with staff schedules
- Know which components have unacceptable levels of hardware issues
- Report on who arms and disarms your security

ConnexALL® is a highly flexible and scalable integration system, easy to configure, provides an intuitive user interface and includes extensive management reporting.

- Interface with:
- Security and Emergency Systems
 - Lighting Control Systems
 - HVAC Systems
 - Patient or Client Monitoring Systems
