## About ConnexALL®

ConnexALL® breaks the barriers of proprietary interfaces, it provides a single point of management for ALL business systems which need to communicate events and status to many different devices.

ConnexALL® seamlessly integrates proprietary event-based business systems to an ever-expanding list of third-party notification technologies.

If "something happens" and "someone needs to know about it" ConnexALL® is the communications bridge that can intelligently bring the two together.

ConnexALL® is a standards-driven, modular based software engine. It integrates a wide range of communication resources to any business systems. The ability to receive real-time notifications and text messages anywhere in the world gives organizations the competitive edge in decision-making process.

connexALL®

HVAC Solution

ALERTS

- Immediate notification when any HVAC system is off-line or malfunctioning
- Escalate alerts if an employee doesn't acknowledge receipt of an error message
- Emergency alerting directly to management and/or maintenance personnel in case of pressure changes, flooding, exceeded temperatures, low air quality or any other event

ANALYZING USAGE

- Calculate and project when your systems will need maintenance
- Optimize HVAC schedules for thermal comfort and energy efficiency
- Stock consumables such as filters based on usage trends

CONTROLLING EVENTS

- Monitor all HVAC systems from a central location or mobile device
- Remotely restart your systems in the event of an error
- Allow user-override controls using control panels or remotes
- Notify managers or facility services based on events

HVAC EVENTS

- Use easy-to-understand icons to set schedules, system setpoints, controllers and alarms
- Monitor multiple interior and exterior zones for temperature, humidity, absorption rates or pressure relationships
- Use sensors to take advantage of day lighting, natural ventilation and cooling opportunities
- Use GPS, motion sensors or RFID to change settings based on occupancy levels
- Control fans, vents, pipes, pumps, dampers, filters, compressors, evaporators, radiators, humidifiers and more
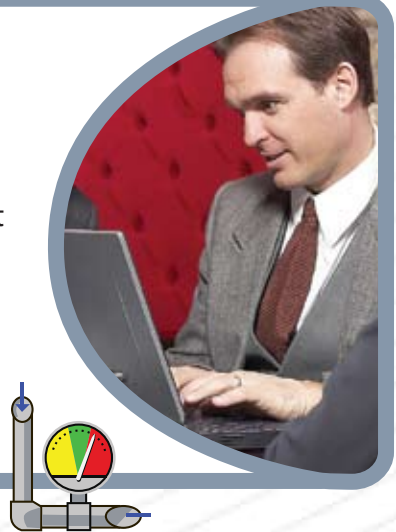

MANAGING AND REPORTING

- Inform maintenance personnel of needed parts before they arrive at on-site problems location or mobile device
- Access systems remotely using secure web-based or mobile communications
- Grant temporary or permanent access to specific systems and locations
- Know which components have unacceptable levels of hardware issues
- Report on which areas have high user-override usages

ConnexALL® is a highly flexible and scalable integration system, easy to configure, provides an intuitive user interface and includes extensive management reporting.

- Office and Retail Facilities
- Building Automation
- Restaurant Refrigeration
- Theatrical or Architectural Special Effects
